

Programme Outcomes (PO) (B.A Kannada)

P01. Subject Knowledge: Graduates should possess a comprehensive understanding of the core subjects within their chosen field of study, which may include subjects like Literature, History, Political Science, Economics, Sociology, Psychology, etc.

P02. Critical Thinking: Students should be able to analyze, evaluate, and interpret information and ideas critically. They should develop the ability to identify assumptions, recognize biases, and construct well-reasoned arguments.

P03. Effective Communication: Graduates should be proficient in expressing ideas and concepts clearly and coherently, both in written and verbal forms. They should be able to present their thoughts persuasively and tailor their communication for different audiences.

P04. Cultural and Global Awareness: Graduates should have an understanding of various cultures, societies, and global issues. This awareness helps them appreciate diversity, adapt to different contexts, and engage in meaningful cross-cultural interactions.

P05. Ethical and Social Responsibility: Students should develop a sense of ethical responsibility and social consciousness. They should be aware of their role in society, understand social issues, and contribute positively to their communities.

P06. Interdisciplinary Perspective: Depending on the specialization or electives chosen, graduates should be able to synthesize knowledge from multiple disciplines and apply diverse approaches to problem-solving.

P07. Adaptability and Lifelong Learning: Graduates should be equipped with the skills to adapt to changing circumstances and continue learning throughout their lives. This could involve learning new technologies, keeping up with evolving trends, and acquiring new knowledge as needed.

P08. Teamwork and Collaboration: Students should be able to work effectively in teams, understand group dynamics, and contribute constructively to collective efforts. This skill is important for both professional and personal settings.

P09. Creativity and Innovation: Graduates should foster a creative mindset and be open to innovative ideas. They should be able to think outside the box, propose new solutions, and explore unconventional approaches to challenges.
